

Aviation Terminal Crimping Machine

RSM-ACM-034

Feature

- ▶ User-friendly with built-in quadrilateral crimping applicator. There is no need to change the applicator when crimping various terminals.
- ▶ Safety guaranteed by horn-type threading port and fully closed processing.
- ▶ Equipped ferrule missing testing function and SMC pneumatic components.
- ▶ Time-saving by adopting centrifugal vibration disc to feed the terminal automatically.
- ▶ Higher productivity and less rework. Twisting function would prevent wire core disorder.

No Twisting

Specification

Model	RSM-ACM-034
Capacity	0.13mm ² -4mm ² (AWG26-AWG11)
Ferrule Length	Max. 12mm
Crimping Shape	Square, Eight-point crimping
Jacket Stripping Length	Min. 40mm
Cycle Time	2.5s
Productivity	1000-1300pcs/ h
Power	400W
Voltage	AC 220V 50/60HZ
Weight	68kg
Dimension	L430mm x W505 mm x H425mm
