

HST Shrinking Machine (End Type)

RSE-HST-525

Feature

- ▶ The machine can automatically cut the heat-shrinkable tube
- ▶ The sleeve length, specification, temperature and time can be adjusted
- ▶ The operator only needs to insert the product into the guide hole, step on the foot switch, and the machine will heat shrink the casing
- ▶ Scope of application: Wires and related products which require HST cover.

Specification

Model	RSE-HST-525
HST Length Range	5~25mm (Greater need to assess feasibility for customization, but simultaneous application of tube lengths more than 5mm apart on the same machine is not recommended)
Tube OD	Φ 1.0~Φ 5.5mm (Greater need to assess feasibility for customization)
Precision Of Tube Length	±0.3mm
Tube Positioning Accuracy	±0.2mm
Productivity	500~1300 PCS/Hour (Depends on the size of the tube)
Power	1100W
N.W.	200KG
Dimension	L700 X W800X H1220mm
