

HST Shrinking Machine For HV/EV Cable

RSM-HST-716

Feature

- ▶ The machine can automatically cut the heat-shrinkable tube
- ▶ The sleeve length, specification, temperature and time can be adjusted
- ▶ The operator only needs to insert the product into the guide hole, step on the foot switch, and the machine will heat shrink the casing
- ▶ Productivity up to 300-1000/h (depends on the operation speed)
- ▶ Greater Capatibility , the fixtures and accessories can be customized according to the tube size and processing requirement.
- ▶ Heating postion can be guaranteed by closed loop motor control which can be adjust on HMI.
- ▶ Equipped with temperature monitor to prevent the over heating , to extend the life of machine.
- ▶ With system reset function to prevent the wrong operation from Operator.

Specification

Model	RSM-HST-716
HST Tube Size	Ø7mm-Ø16mm
HST Tube Length	10MM-100MM(with the jigs / accesseries changed)
Controlling Mode	PLC + HMI
Display	4.3 inch Colorful TFT
Heating Temperature	200°C-400°C (Or Customized)
Air Source	0.55-0.65Mpa
Voltage	AC 220 , Single Phase Or Customized
Frequency	50/60HZ
Nonimal Power	2300W
Weight	About 140KG
Dimension	L950mm*W750mm*H1100mm

Sample Demonstration
