

Plastic Ultrasonic Welding Machine

RSM-UWM-2020P

Feature

- ▶ Suitable for welding products with high precision and high strength requirements.
- ▶ Adopt precision aluminum alloy die casting molding as base, welded with bending steel as frame, seamless steel tube as column, good rigidity, which will not deviation when exert pressure.
- ▶ Electric lifting and adjusting strokes make it easy and convenient.
- ▶ Adopt Taiwan ABBA brand guiding column and sleeves, 5 scale parameters can be easily and conveniently adjusted.
- ▶ With horizontal adjustment function, which makes workpiece calibrated more convenient.
- ▶ The electronic overload protection system, trimming and cylinder as the trinity which can be directly driven and make the best use of welding
- ▶ Adopt digital operation control, welding parameters can be set in sections, applied to different welding materials.
- ▶ The device can realize automatic frequency modulation in the range of 20khz \pm 100hz and automatically remember the last frequency search result

Specification

Model	RSM-UWM-2020P
Power	2000W
Frequency	20KHZ
Cylinder stroke	75mm
Welding area	∅ 160mm
Voltage	AC220V
Weight	102KG
Dimension	650mm*400mm*1000mm
