

Automatic Ultrasonic Welding Machine

RSM-UWM-D20Z

Feature

- ▶ No need manual terminal loading. Automatic terminal feeding, terminal tape chopping and welding with terminal reel assembly.
- ▶ Various welding modes are available. Best welding results are guaranteed by adjustment according to the specific welding needs.
- ▶ Supports sequential welding control and unit work for precise control of each welding point, which can improve the consistency and reliability of the welding.
- ▶ High flexibility. Support networking control and data monitoring, multiple desktop changes for various production settings, and integration into the production line.
- ▶ Password protection and parameter storage to improve the traceability and data management capabilities of the welding process.
- ▶ Supports product traceability through the integration of process data via barcodes and QR codes.
- ▶ User-friendly interface, Windows 7 system to support function expansion.

Specification

Model	RSM-UWM-D20Z
Application	Copper wire, aluminum wire, copper and aluminum terminals
Cable O.D.	6mm ² -16mm ²
Thickness	≤3mm
Frequency	20KHZ
Air Source	0.05-0.6Mpa
Voltage	380V, N, PE
Weight	About 380Kg
Dimension	L1000mm*W1500mm*H2100mm
